

Reading in the Summer

In an effort to encourage your son's or daughter's reading achievements, as well as improve his or her elementary school performance, the school encourages each child to complete the attached reading packet. The packet contains work that the students have worked on during the course of the year. Use of this packet will help your child in the practice and retention of skills that he/she has learned through the course of the school year. It will also help them have a better start to the new school year in September. We hope that you and your child will take this reading packet seriously, as it will help your child to review skills and grow in the area of reading. Teachers will be collecting the packets the first three days of the new school year. Please have your child bring in the completed packet as soon as possible.

On rainy days, your child can practice reading skills using the Internet. The following websites below will assist your child in developing his/her skills in the area of reading:

www.starfall.com

www.kaboose.com/games/read2.html

www.rif.org/readingplanet/

www.gamequarium.com/readquarium/

www.gamequarium.com

<http://pbskids.org/lions/>

www.eduplace.com/kids/hmr/

www.brainpop.com

We also recommend that your child visit the Russell Library this summer and complete their fun summer reading program. We have also enclosed the Governor's Summer Reading Challenge in this packet as well.

Remember to have fun with reading as you make your way through the summer, as reading is everywhere!
